

# Project Report

RINI GARMENT

RINI

Lt. M.J. Kundaliya Arts and Commerce Mahila College (Computer  
Science Department)

**Rashtriya Shala Campus, Rajkot**

**RINI GARMENT**

By

Ms. Nidhi Parmar (003203212737)

Ms. Rinkal Bhimani (003203212662)

Under Guidance

Of

Guide Payal Marviya

Submitted to the Computer Science Department  
in partial fulfilment of the requirement

For the Degree of

**Bachelor**

of

**Computer Application**

**Semester - 06**

**Date: 15-02-2024**

## **CANDIDATE'S DECLARATION**

- We, 003203212737 & 003203212662, certify that this project is my own work based on my personal study and research and that I have acknowledge all material and sources used in its preparation , whether they be books , articles, reports, lecture notes, and any other kind of document, electronic or personal communication.
- I also certify that this project has not previously been submitted for assessment in any academic capacity. And that i have not copied in part or whole or otherwise plagiarised the work of other persons.
- I confirm that i have identified and declared all possible conflicts that I may have signed and submitted.
- We hereby declare that this project work entitled RINI GAMRENT is a record done by us.
- We also declare that the matter embodied in this project is genuine work done by us and has not been submitted whether to this Sauvrastra University for the fulfilment of the requirement of any course of study.

**COLLEGE/ INSTITUTE CERTIFICATE**

## ACKNOWLEDGEMENT

- First of all we are sincerely thanked to *Sauvrastra University* for giving a project as a particular subject.
- We are also greatly grateful to our college *Lt. M. J. Kundaliya Arts & Commerce Mahila College [Computer Science Department]*, Rajkot. We would like to thanks **Prof. Shamik Rathod (HOD)** for providing us opportunity to prepare this project.
- To complete this project many persons help us. But we are specially thanked to **Payal Marviya** for guiding our project analysis and development. He helps us to conceptualize the idea of the project and helped us streamline our work by providing us with every facility required.
- Not only college and guide help us but all the well-wisher who gives us excellent support in during project.
- *Thank To All*

Your Faith Fully,

Parmar Nidhi.

Bhimani Rinkal

## ◆ INTRODUCTION ◆

### 1.0 PROJECT SUMMARY:

- This project will be basic for the development & implementation of the computerized system for better efficiently, effective utilization. An online cloth design the main goal of this project was to create dynamic website, which allows customers to provide information about the garment products online.
- Customers are only getting the information about the clothe products, and they will be contacted to further process for by the clothes. If someone buy new things and he/she want to get information about garment with the help of internet. The website is implemented in asp.net and consists of two main components.
- Most of the people used to wear readymade garment in case of time saving activity. especially ladies have taken very much interest in new design and fashionable garments.
- The Project entitled “Rini Garment” allows users to check for various product the project provides a list of dresses displays online in various models and design the user may browse through these products as per categories. If the user like a product they may add it to his my cart user can register into this site using id, password, Payment select that wish to transact amount by using cash on delivery.
- User Receivers a copy of the shopping receiver on email id once the transaction is successful. The Rini Garment project brings on entries fashion shop online and makes it easy for both buyer and seller to make dress deals. The products displayed in this site includes categories men's , women's and kid's wear. The site is attractive and users friendly so that any new users to the site also easy able to purchase.

Platform	Asp.Net
Operating System	Windows 10,11
Front End Tool	Asp.Net
Back End Tool	Sql Server 2012
Editing Tool	Visual Studio Code

Add More Description As Per Project Preliminary Investigation....

## 1.2 PURPOSE: GOALS & OBJECTIVES

- Online systems are less time consuming than manual system.
- Data manipulations are more reliable and accurate.
- Making, searching and updating very easy.
- Data security is more and user friendly.
- Portable and flexible.
- Timely and accurate information can be obtained.
- There is no possibility for double entries.
- Prevent data redundancy.
- Helps to make well formatted reports.
- Reduce workload of employees, storage space, complexity of manual calculations, manual work.
- Enable to view large volume of data in a short period of time.
- Large number of ledger books has to be maintained for each transaction.

## 1.3 HARDWARE AND SOFTWARE REQUIREMENTS

### Hardware requirements:

Processor	<b>Intel(R) Core (Tm) I3/I5-6006u</b> <u>Cpu@2.00ghz 1.99ghz</u>
Hard Disk	<b>Minimum 130gb Or Higher</b>
Ram	<b>8GB</b>
Monitor	
System Type	<b>64-Bit Operating System</b>

### Software requirements:

Platform	<b>ASP.NET</b>
Operating System	<b>Windows 10, 11</b>
Front End Tool	<b>ASP.NET</b>
Back End Tool	<b>SQL Server 2012</b>
Editing Tool	<b>Visual Studio Code</b>

## ♦ SYSTEM ANALYSIS ♦

### 2.0. STUDY OF CURRENT SYSTEM

- At present all the activities in transaction are handles manually. Manual data processing system, whole providing economy, flexibility and adaptability at low data volumes become more complex when the volume of data becomes large.
- As an organization expands in size and function , a stage is reached when manual procedures become inadequate and inefficient no matter how many clerks are employed a stage is reached them it becomes impossible to systemize such as large amount of information.
- What is required then is an upgrading in the class of information processing technology to had all the information that is necessary for the processing.
- So the library is in need of new computerized system which is very flexible,user-friendly and capable of holding the system in a robust manner. But maintaining the same quality or upgrading the ultimate picture the business.
- There were a lot of reasons for the introduction of the system. They are mainly due to the drawbacks and efficiently of the existing system, Good quality of a product depends on many factors.
- So to obtain optimum quality garment have to upgrade those ingredient by which the quality is attached. Rini Garment is developed in .net which can keep track of your business activity in a large and very large segments.

## **2.0 PROBLEM AND WEAKNESSES OF CURRENT SYSTEM:**

- Manual systems are more time consuming.
- Large number of ledger books has to be maintained for each transaction.
- Since the data are entered manually there are possibilities for errors.
- Data security is very minimal.
- There is a possibility for double entries.
- Generating the reports in the desired format is a tedious process.
- Data stored on papers is subject to loss due to physical damage.
- Physical volume of the data is very large.
- The delay in information search and retrieval.
- Problems in updating and backup.
- Damage of papers containing the information.
- Accuracy of data is very lower in manual system.

## **2.3 REQUIREMENTS OF NEW SYSTEM:**

- The system study phase studies the problem, identifies alternate solution, evaluates these solutions and finally recommends best solution. The site gives the structure and function of the garments shop. A detailed subject study is essential for developing an efficient web site.
- The proposed system provides a better user interface. Now a days lots of the garments shop is useful for shopping site. The admin have lots of paper work and they are using desktop, spreadsheet like MS Excel application to manage data in soft copy about user record. In this proposed garment system, it will run in server and user can handle whole the registration activities.
- The main aim of this project is to evaluate the efficient and efficacy of developing garment shop so that business transactions are easy. From those in use at a database. To reduce the manual efforts needed to manage transactions for historical data used.

## 2.4 FEASIBILITY STUDY

- A feasibility when starting off a project you would need to a look at if it is a possible to create this project. The objective of this website is to determine quickly and at a minimum expense to establish how to solve a problem. Feasibility study is essential to evaluate cost and benefits of the proposed system. There are 3 types of feasibility....

- *Technical*
- *Economical*
- *Operational*

### ○ **Technical:**

- The technical feasibility of the system counts for the technical acceptance of the system. It refers to the ability of the process to take advantages of the current state of the ability of the process to take advantage of the current state of the technology in parsing further imporvement.
- Eassy to use when the users were assumed to be normal ordinary people having knowledge of simple computer operation. It is reliable when we assume that the device will receive lot vibrations etc. Easy maintenance of information save time & efforts.

- Input device.
- Output device.
- Choice of processing unit.

## ○ Economical :

- It means that the project benefits of the proposed system out weight the estimated cost of usually considered the total cost of ownership. It determines whether the time & money are available to develop system that includes the purchase of new equipment hardware & software.

<b>Operation System</b>	₹4850
<b>Hard Disk</b>	₹1999
<b>Ram</b>	₹1775
<b>SQL Server 2012</b>	<i>Freeware</i>
<b>Visual Studio 2015</b>	<i>Freeware</i>
<b>Total Cost</b>	₹8624

## ○ Operational:

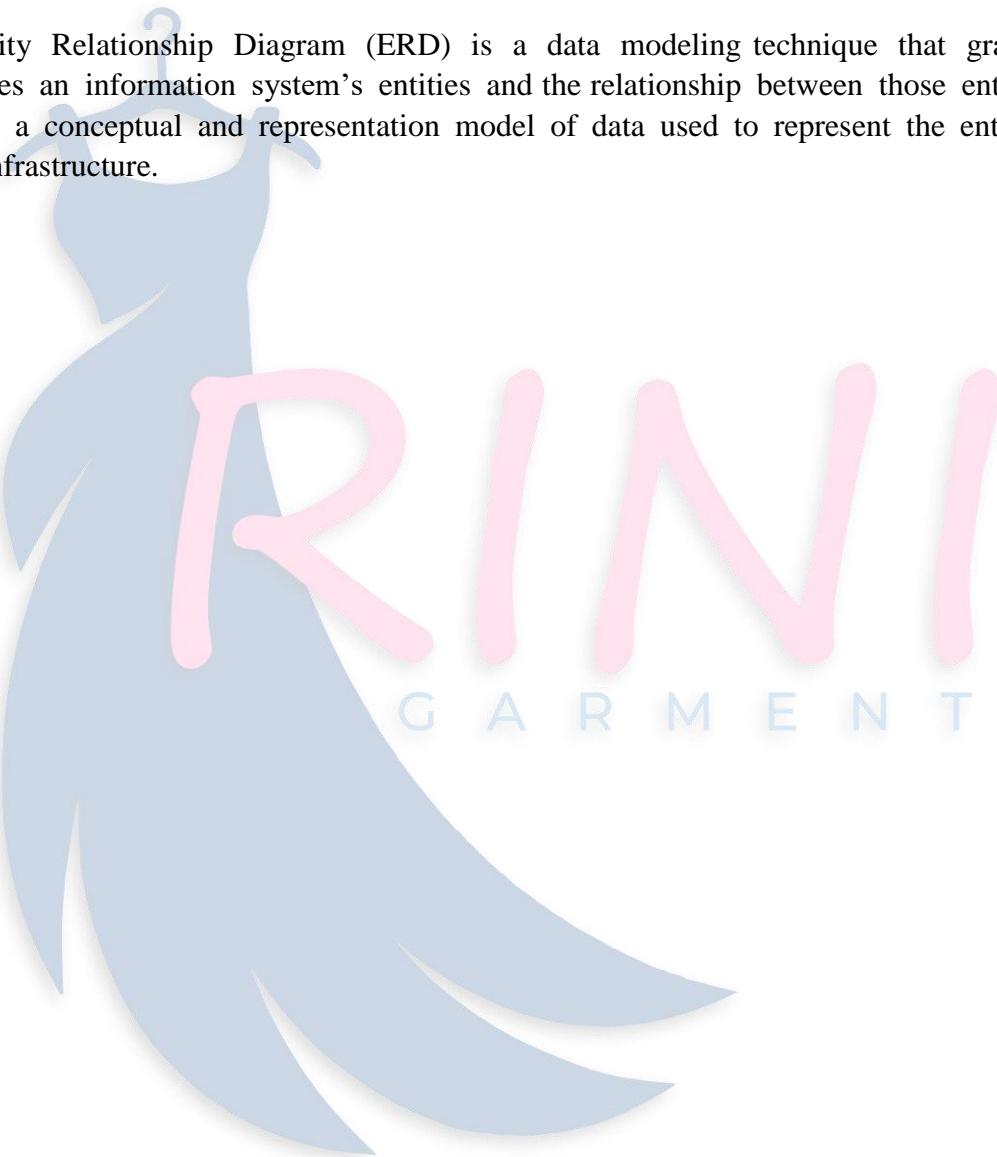

- It determines if the human resource are available to operate any system once it has been installed. It is also include on analysis of how the purposed system will affect organizational structure and procedure. If company has any issue or problem with project they can tell us after that we must try to solve the problem in issue within our capacity or limits.
- After the project completion or implementing many changes can occurs in feature because the updating is mandatory day to day. In this updating duration there are some errors or problems occur at that time owner of company can contact us. We just try to solve problem and give some tutorial and some direction or key point to owner by using that key can easily solve that problem.

## 2.5 DATA MODELING

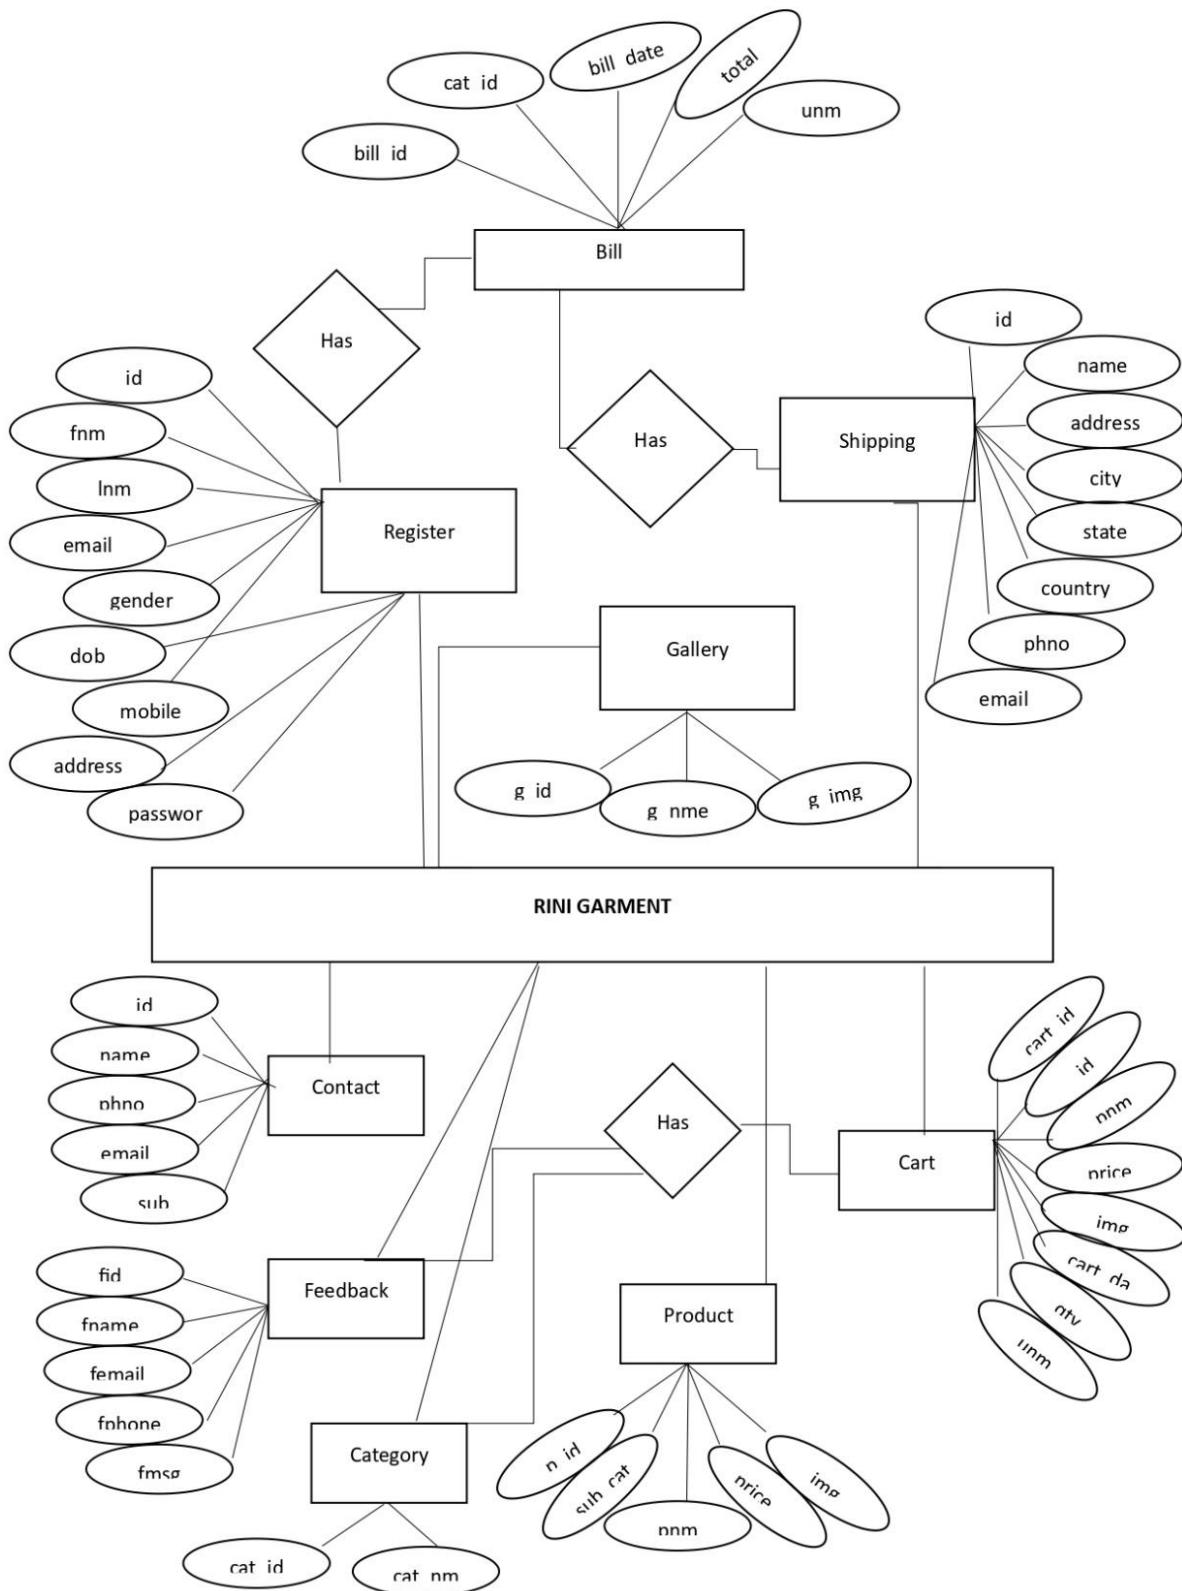

### 2.5.1 E-R diagram

- An entity Relationship Diagram (ERD) is a data modeling technique that graphically illustrates an information system's entities and the relationship between those entities. An ERD is a conceptual and representation model of data used to represent the entity from work infrastructure.

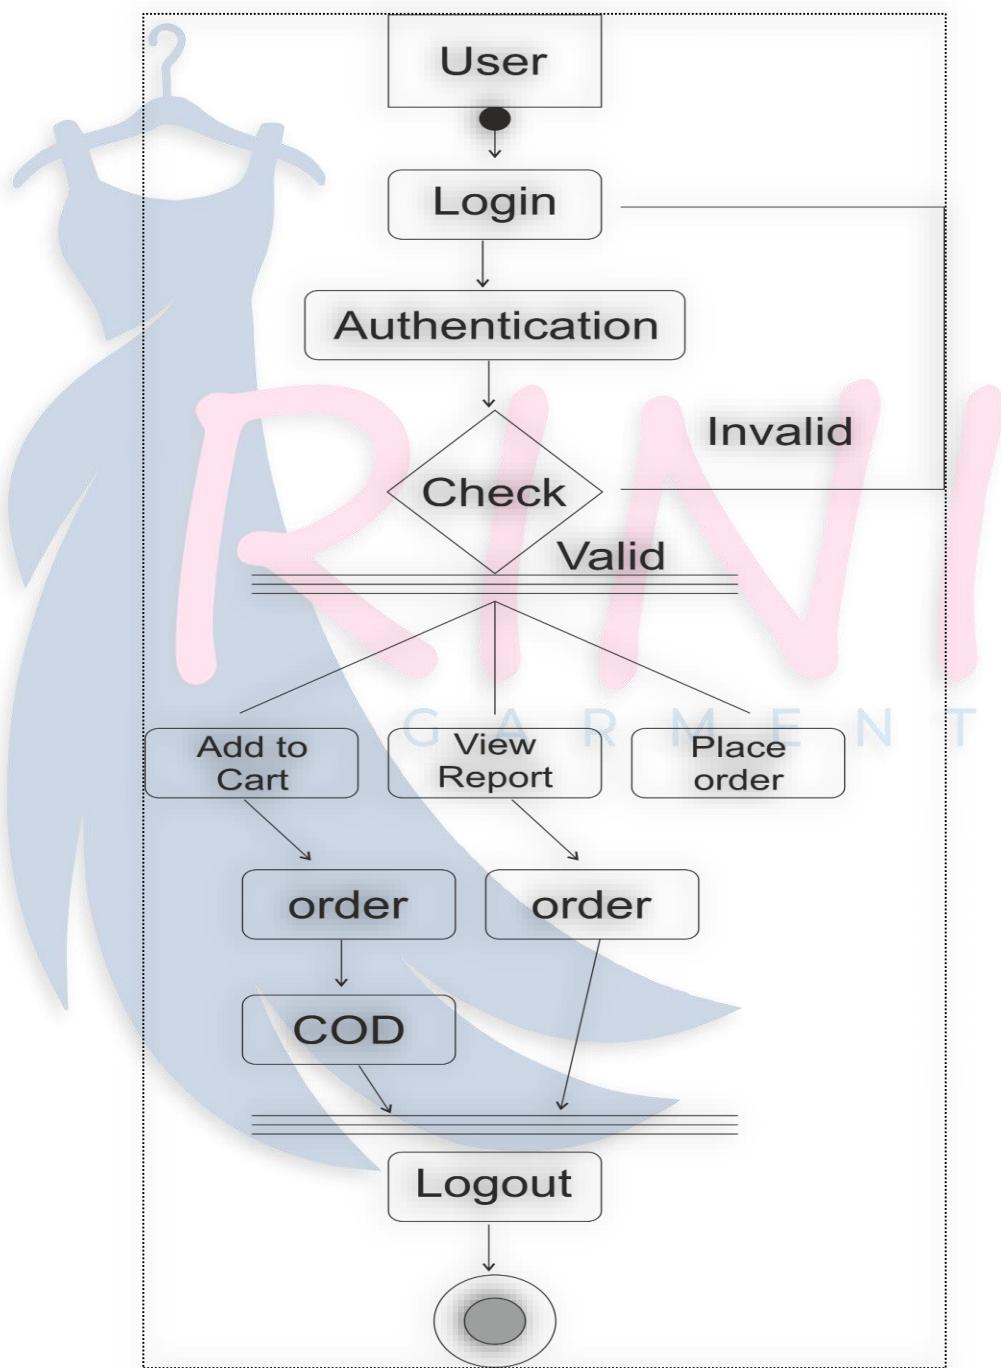

# RINI GARMENT

## 2.5.2. System Activity or object interaction Diagram

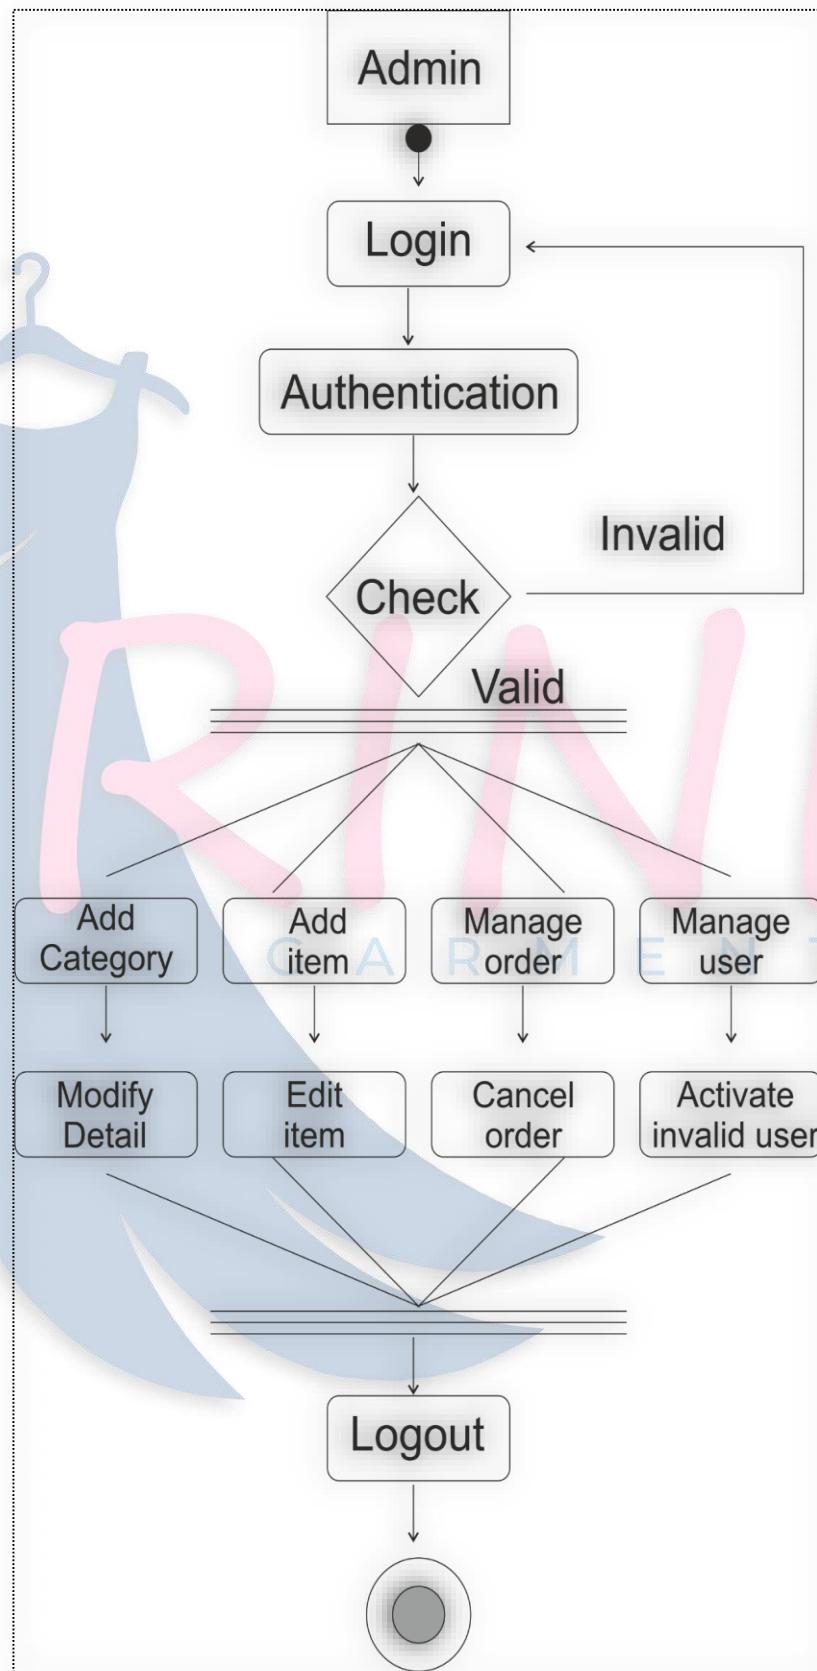

*Client side:*

# RINI GARMENT

Admin side:

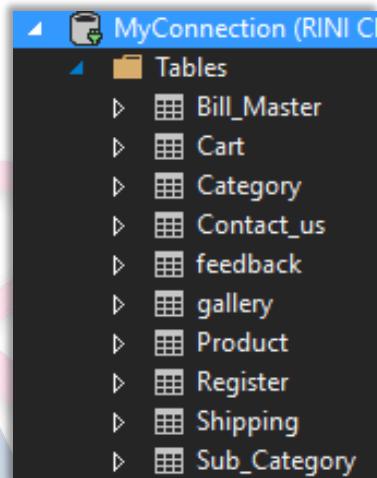

### 2.5.3.Data dictionary

In data dictionary there are 4 fields in table field name, Data type, size and description.

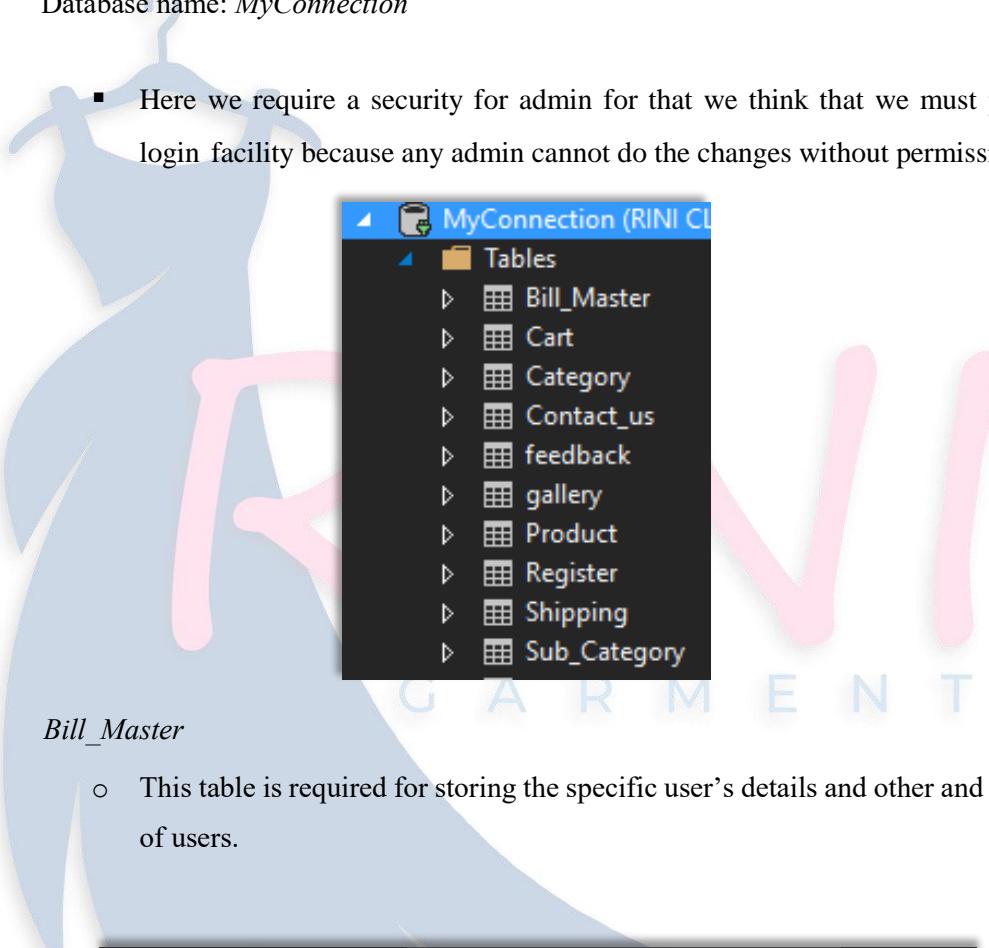

Database name: *MyConnection*

- Here we require a security for admin for that we think that we must provide a login facility because any admin cannot do the changes without permission.

*Bill\_Master*

- This table is required for storing the specific user's details and other and description of users.

	Name	Data Type	Allow Nulls	Default
bill_id	int	<input type="checkbox"/>		
cartid	int	<input type="checkbox"/>		
bill_date	varchar(50)	<input type="checkbox"/>		
total	bigint	<input type="checkbox"/>		
unm	varchar(50)	<input type="checkbox"/>		

## Cart

- Below table through use can get the information about user's items if user gets the things of information than they can easily purchase the items.

	Name	Data Type	Allow Nulls	Default
1	cartid	int	<input type="checkbox"/>	
2	pid	int	<input type="checkbox"/>	
3	pnm	varchar(50)	<input type="checkbox"/>	
4	price	int	<input type="checkbox"/>	
5	img	varchar(200)	<input type="checkbox"/>	
6	cart_date	varchar(50)	<input type="checkbox"/>	
7	qty	int	<input type="checkbox"/>	
8	unm	varchar(50)	<input type="checkbox"/>	

## Category

- Bellow table through use can get the information about the different items if user gets the details of items than they can easily get the details.

	Name	Data Type	Allow Nulls	Default
1	cat_id	int	<input type="checkbox"/>	
2	cat_nm	varchar(50)	<input type="checkbox"/>	

# RINI GARMENT

## Contact\_us

- This table is required for storing the contact details resources of RINI GARMENT (like address, contact no) by using that user can easily contact us

Name	Data Type	Allow Nulls	Default
id	int	<input type="checkbox"/>	
name	varchar(50)	<input type="checkbox"/>	
phno	bigint	<input type="checkbox"/>	
email	varchar(50)	<input type="checkbox"/>	
subject	varchar(50)	<input type="checkbox"/>	
message	varchar(200)	<input type="checkbox"/>	

## Feedback

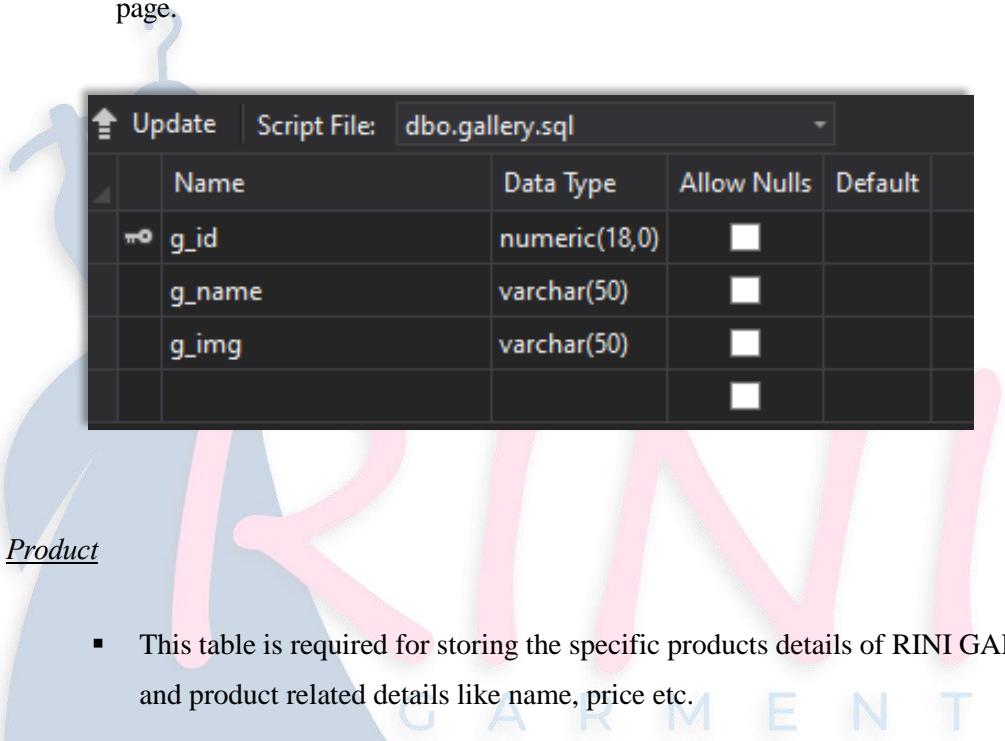

- This table is creating to store the feedbacks of user which they are given for our & Rini garment.

Name	Data Type	Allow Nulls	Default
fid	int	<input type="checkbox"/>	
fname	varchar(50)	<input type="checkbox"/>	
fphno	bigint	<input type="checkbox"/>	
femail	varchar(50)	<input type="checkbox"/>	
fmsg	varchar(50)	<input type="checkbox"/>	

## Gallery

- This Table stores the images of product and other and description for gallery page.

Update | Script File: dbo.gallery.sql

Name	Data Type	Allow Nulls	Default
g_id	numeric(18,0)	<input type="checkbox"/>	
g_name	varchar(50)	<input type="checkbox"/>	
g_img	varchar(50)	<input type="checkbox"/>	

## Product

- This table is required for storing the specific products details of RINI GARMENT and product related details like name, price etc.

Update | Script File: dbo.Product.sql

Name	Data Type	Allow Nulls	Default
pid	int	<input type="checkbox"/>	
sub_cat_id	int	<input type="checkbox"/>	
pnm	varchar(50)	<input type="checkbox"/>	
price	int	<input type="checkbox"/>	
img	varchar(200)	<input type="checkbox"/>	

## Register

- This table is required for storing the specific user's details and other and description of users.

Update | Script File: dbo.Register.sql

	Name	Data Type	Allow Nulls	Default
1	id	int	<input type="checkbox"/>	
2	fnm	varchar(50)	<input type="checkbox"/>	
3	lnm	varchar(50)	<input type="checkbox"/>	
4	email	varchar(50)	<input type="checkbox"/>	
5	password	varchar(50)	<input type="checkbox"/>	
6	gender	varchar(6)	<input type="checkbox"/>	
7	dob	varchar(50)	<input type="checkbox"/>	
8	mobile	bigint	<input type="checkbox"/>	
9	address	varchar(100)	<input type="checkbox"/>	

Shipping

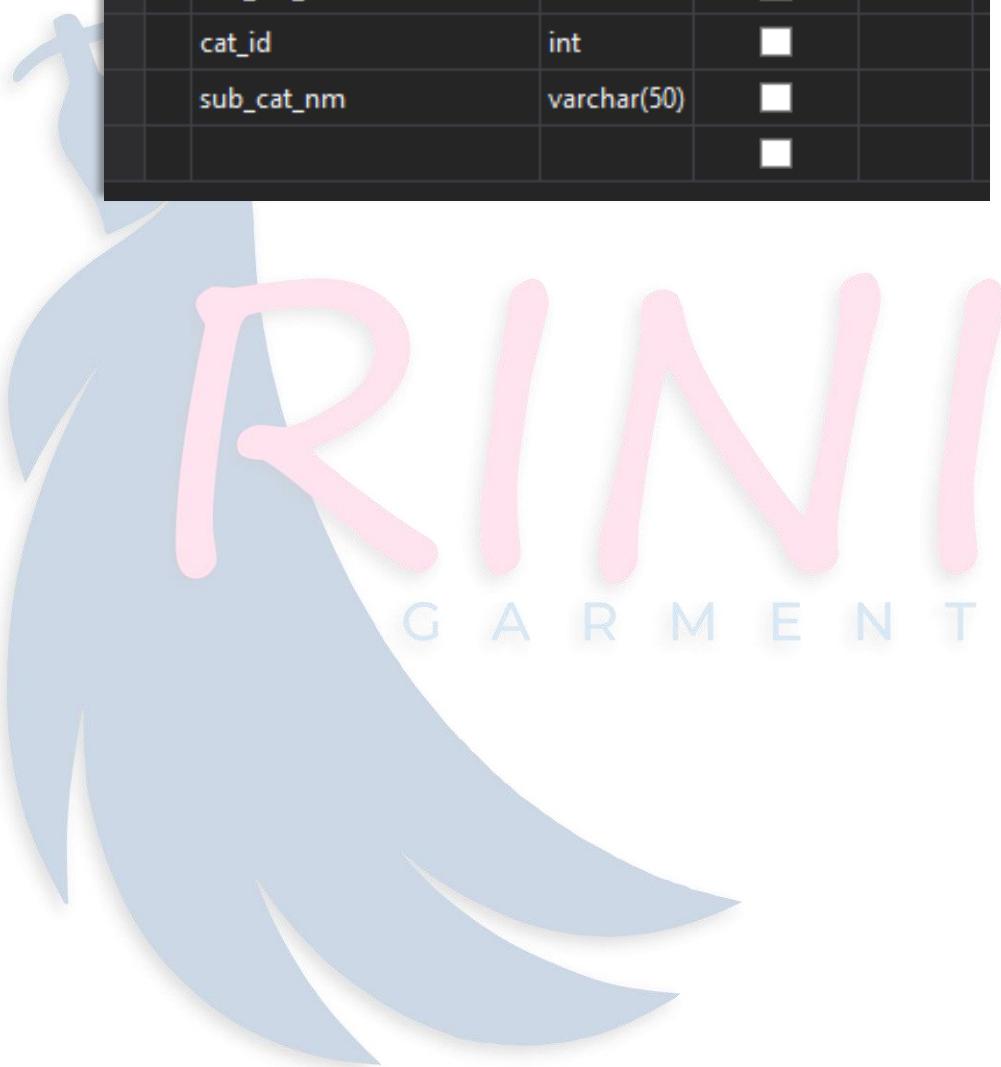

Update | Script File: dbo.Shipping.sql

	Name	Data Type	Allow Nulls	Default
1	id	int	<input type="checkbox"/>	
2	name	varchar(50)	<input type="checkbox"/>	
3	address	varchar(100)	<input type="checkbox"/>	
4	city	varchar(50)	<input type="checkbox"/>	
5	state	varchar(50)	<input type="checkbox"/>	
6	country	varchar(50)	<input type="checkbox"/>	
7	phno	bigint	<input type="checkbox"/>	
8	email	varchar(50)	<input type="checkbox"/>	

## Sub\_Category

	Name	Data Type	Allow Nulls	Default
1	sub_cat_id	int	<input type="checkbox"/>	
2	cat_id	int	<input type="checkbox"/>	
3	sub_cat_nm	varchar(50)	<input type="checkbox"/>	<input type="checkbox"/>

## ♦ TESTING ♦

### 3.1 Testing Plan

- Software testing can be stated as the process of verifying and validating whether a software or application is bug-free, meets the technical requirements as guided by its design and development, and meets the used requirements effectively and efficiently by handling all the exceptional and boundary cases.

Software testing can be divided into two steps:

*Verification:*

“Are we building the product right?”

*Validation:*

“Are we building the right product?”

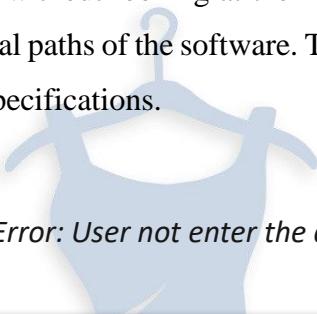

### 3.2 Testing Methods

Software testing techniques can be majorly classified into two categories:

## ○ Black Box Testing

- It is a software testing techniques in which functionality of the software under test (SUT) is tested without looking at the internal code structure, implementation details and knowledge of internal paths of the software. This type of testing is based entirely on the software requirements and specifications.

*Error: User not enter the data direct login that time generate the error.*

Please Enter the username and password...

User Name:

Password:

Login   Register Now

*Solution: Fill out the correct data.*

**Login Form**

User Name: admin

Password: \*\*\*\*\*

**Login** **Register Now**

○ **White Box testing**

- White Box testing is based on an analysis of internal working and structure of a piece of software. White box testing is the process of giving the input to the system and checking how the system processes that input to generate the required output. It is necessary for a tester to have full knowledge of the source code.

*Error: User not enter the data of fields that time generate error.*

◆ Screenshots and User Manual ◆

**Login Page:**

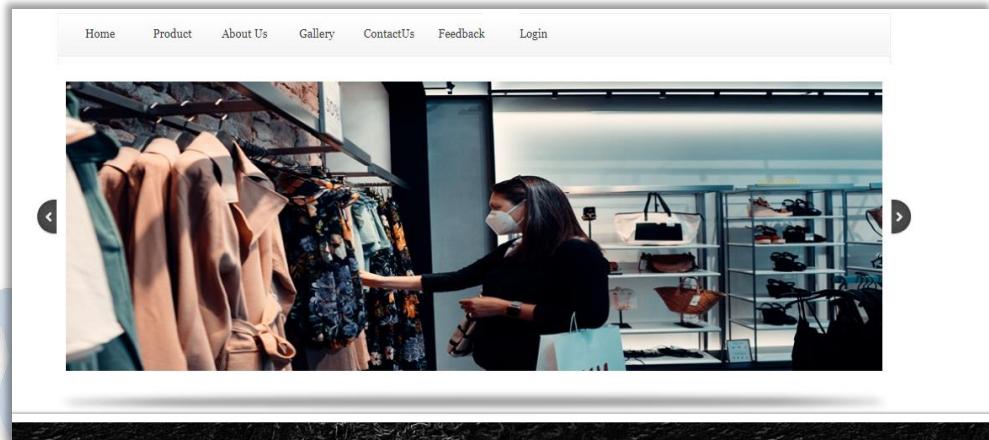

The screenshot shows a dark-themed login form titled "Login Form". It features two input fields: "User Name:" and "Password:", both represented by white rectangular boxes. Below these fields are two orange buttons: "Login" on the left and "Register Now" on the right. The background of the form is black.

**Registration Form**

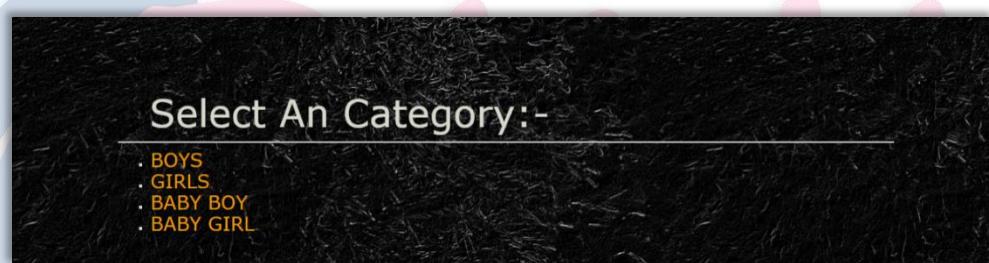

The screenshot shows a registration form titled "Registration Form". It contains several input fields: "First Name:" and "Last Name:" (both white boxes), "E-Mail :" (white box), and "Password :" (white box). Below the password field is a "confirm password:" label followed by another white box. At the bottom of the form, there are gender selection buttons: "gender :  Male" and " Female". There are also fields for "Date Of Birth" (white box with placeholder "(dd/mm/yyyy)"), "Mobile" (white box), and "address :" (white box). At the very bottom are two small buttons: "submit" and "clear". The background of the form is black.

## About Us Page

**Welcome to RINI GARMENT**

Welcome To Our Site.

**Our Mission**

In movies actor and actresses are wearing different types of dresses and sarees. Every person wants to look like them. With the increase in fashion every person want to wear those types of garments. Some people purchase garment material and visit at the tailor shop for stitching the dresses they like.

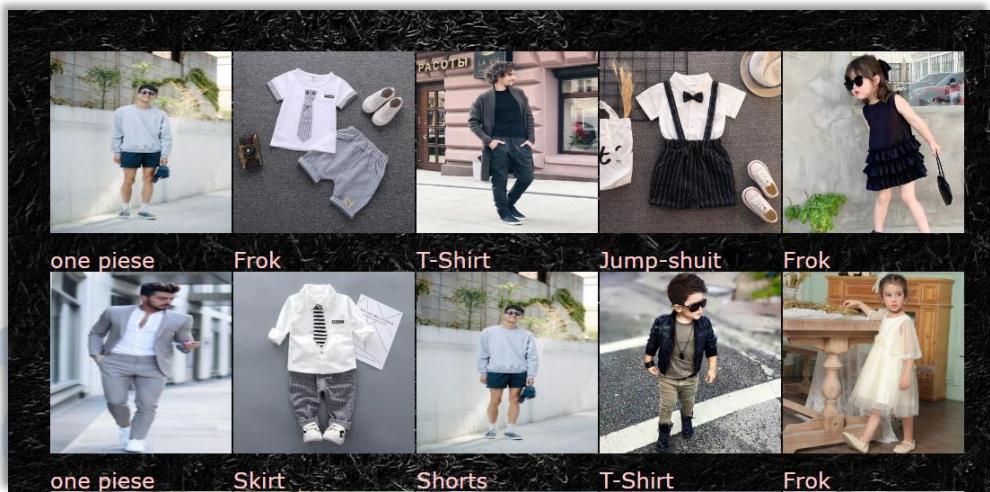

**Our Vision**

The Project entitled "RINI GARMENT" allows users to check for various products. The project provides a list of dresses displays online in various models and designs. The user may browse through these products as per categories. If the user likes a product they may add it to his my cart.

**Our Value**

The RINI GARMENT project brings an entire fashion shop online and makes it easy for both buyer and seller to make dress deals. This website can host the fashion dresses to be sold online. Administrator of the site creates the products and uploads them on the site. He fixes the price for the products. All the uploaded products in the site are available online. Any user visiting the site can view the product and can purchase only online.

### FUTURE ENHANCEMENT ♦

- In future we will provide the facility of online shopping. Billing will be added in our website and we also provide all the information related to the RINI GARMENT. This website will be increasing in that and this is achievement of our website.
- Our site can also make popular the products of RINI GARMENT.

### ♦ BIBLIOGRAPHY ♦

- [www.w3school.com](http://www.w3school.com) write page list
- We use from this site some effects demo and done animation code.
