Rashtriya Shala Campus, Rajkot**

JB JEWEL

By

Ms. Nidhi Parmar (003203212737)

Ms. Rinkal Bhimani (003203212662)

Under Guidance

Of

Guide Prof. Satvik Salat

Submitted to the Computer Science Department

in partial fulfillment of the requirement

for the degree of

Bachelor

of

Computer Application

Semester - 05

Date: 25-09-2023

CANDIDATE'S DECLARATION

- ☒ we, 003203212737 & 003203212737 , certify that this project is my own work based on my personal study and research and that I have acknowledge all material and sources used in its preparation , whether they be books , articles, reports, lecture notes, and any other kind of document, electronic or personal communication.
- ☒ I also certify that this project has not previously been submitted for assessment in any academic capacity. and that I have not copied in part or whole or otherwise plagiarised the work of other persons.
- ☒ I confirm that I have identified and declared all possible conflicts that I may have signed and submitted.
- ☒ we hereby declare that this project work entitled JB JEWEL is a record done by us.
- ☒ we also declare that the matter embodied in this project is genuine work done by us and has not been submitted whether to this Sauvrastra university for the fulfilment of the requirement of any course of study.

JB JEWEL

COLLEGE/ INSTITUTE CERTIFICATE

ACKNOWLEDGEMENT

- First of all we are sincerely thanked to Saurashtra University for giving a project as a particular subject.
- We are also greatly grateful to our college **Lt. M. J. Kundaliya Arts & Commerce Mahila College [Computer Science Department], Rajkot**. We would like to thanks **Prof. Shamik Rathod (HOD)** for providing us opportunity to prepare this project.
- To complete this project many persons help us. But we are specially thanked to **Prof. Satvik Salat** for guiding our project analysis and development. He helps us to conceptualize the idea of the project and helped us streamline our work by providing us with every facility required.
- Not only college and guide help us but all the well wisher who gives us excellent support in during project.

Thank To All

Your Faith Fully,
Parmar Nidhi.
Bhimani Rinkal.

1.0 INTRODUCTION

1.1 PROJECT SUMMARY:

This project will be basic for the development & implementation of the computerized system for better efficiently, effective utilization. An online jewelry design the main goal of this project was to create dynamic website, which allows customers to provide information about the jewellery products online. Customers are only getting the information about the Jewellery products, and they will be contacted to further process for by the jewellery. If someone buy new things and he/she want to get information about jewellery with the help of internet. The website is implemented in PHP and consists of two main components.

Admin side consists of the features such as creating username and password, input items, modify items, delete items, database and admin login. Customer side consists of the features such as select products for add to cart, client login, client registration. Information about the jewellery is one of the important facility provided in online informative website. Our websites are provide the all information about large amount of variety of “JB JEWEL SHOP” products.

Platform	Php
Operating System	Windows 10,11
Front End Tool	Php
Back End Tool	Mysql Server
Editing Tool	Visual Studio Code

Add More Description As Per Project Preliminary Investigation....

1.2 PURPOSE: GOALS & OBJECTIVES

- ¤ Online systems are less time consuming than manual system.
- ¤ Data manipulations are more reliable and accurate.
- ¤ Making, searching and updating very easy.
- ¤ Data security is more and user friendly.
- ¤ Portable and flexible.
- ¤ Timely and accurate information can be obtained.
- ¤ There is no possibility for double entries.
- ¤ Prevent data redundancy.
- ¤ Helps to make well formatted reports.
- ¤ Reduce workload of employees, storage space, complexity of manual calculations, manual work.
- ¤ Enable to view large volume of data in a short period of time.
- ¤ Large number of ledger books has to be maintained for each transaction.

1.3 HARDWARE AND SOFTWARE REQUIREMENTS

Hardware requirements:

Processor	Intel(R) Core (Tm) I3/I5-6006u <u>Cpu@2.00ghz</u> 1.99ghz
Hard Disk	Minimum 130gb Or Higher
Ram	4gb
Monitor	
System Type	64-Bit Operating System

Software requirements:

Platform	PHP
Operating System	Windows 10, 11
Front End Tool	PHP
Back End Tool	MYSQL Server
Editing Tool	Visual Studio Code

2.0 SYSTEM ANALYSIS

2.1 STUDY OF CURRENT SYSTEM

- ¤ At present all the activities in transaction are handles manually. Manual data processing system, whole providing economy, flexibility and adaptability at low data volumes become more complex when the volume of data becomes large.
- ¤ The present system is not sufficient to hold all the information that is necessary for the processing. So the library is in need of new computerized system. Which is very flexible, user-friendly and capable of holding the system in a robust manner.
- ¤ But maintaining the same quality or upgrading the present one is not an easy task because quality is the ultimate picture of the entire business. There were a lot of reasons for the introduction of the new system. They are mainly due to the drawbacks and efficiency of the existing system.
- ¤ “JB Jewel Design” is developed in PHP, which can keep track of your business activity in a jewellery shop from small segments to large and very large segments.

2.2 PROBLEM AND WEAKNESSES OF CURRENT SYSTEM :

- ¤ Manual systems are more time consuming.
- ¤ Large number of ledger books has to be maintained for each transaction.
- ¤ Since the data are entered manually there are possibilities for errors.
- ¤ Data security is very minimal.
- ¤ There is a possibility for double entries.
- ¤ Generating the reports in the desired format is a tedious process.
- ¤ Data stored on papers is subject to loss due to physical damage.
- ¤ Physical volume of the data is very large.
- ¤ The delay in information search and retrieval.
- ¤ Problems in updating and backup.
- ¤ Damage of papers containing the information.
- ¤ Accuracy of data is very lower in manual system.

2.3 REQUIREMENTS OF NEW SYSTEM :

- ¤ The system study phase studies the problem, identifies alternate solution, evaluates these solutions and finally recommends best solution. The site gives the structure and function of the jewellery shop. A detailed subject study is essential for developing an efficient web site. The proposed system provides a better user interface.
- ¤ Now a days lots of the jewellery shop is useful for shopping site. The admin have lots of paper work and they are using desktop, spreadsheet like MS Excel application to manage data in soft
- ¤ copy about user record. In this proposed jewellery system, it will run in server and user can handle whole the registration activities.
- ¤ The main aim of this project is to evaluate the efficient and efficacy of developing jewellery shop so that business transactions are easy. To do this a simple set of tables will be identified from those in use at a database. To reduce the manual efforts needed to manage transactions for historical data used.
- ¤ Online “JB JEWEL SHOP” is basically used to build an application program which help people to bind and buy latest design of jewellery with different categories like gold, silver, rose gold.

2.4 FEASIBILITY STUDY

A feasibility when starting off a project you would need to a look at if it is a possible to create this project. The objective of this website is to determine quickly and at a minimum expense to establish how to solve a problem. Feasibility study is essential to evaluate cost and benefits of the proposed system. There are 3 types of feasibility....

- 1) *Technical*
- 2) *Economical*
- 3) *Operational*

◆ Technical:

- ¤ The technical feasibility of the system counts for the technical acceptance of the system . It refers to the ability of the process to take advantages of the current state of the ability of the process to take advantage of the current state of the technology in pursuing further improvement.
- ¤ Easy to use when the users were assumed to be normal ordinary people having knowledge of simple computer operation. It is reliable when we assume that the device will receive lot vibrations etc. Easy maintenance of information save time & efforts.
 - Input device.
 - Output device.
 - Choice of processing unit.

◆ Economical :

- ¤ It means that the project benefits of the proposed system outweigh the estimated cost of usually considered the total cost of ownership. It determines whether the time & money are available to develop system that includes the purchase of new equipment hardware & software.

Operation System	₹4850
Hard Disk	₹1999
Ram	₹1775
Xampp	Freeware
Mysql	Freeware
Visual Studio Code	Freeware
Total Cost	₹8624

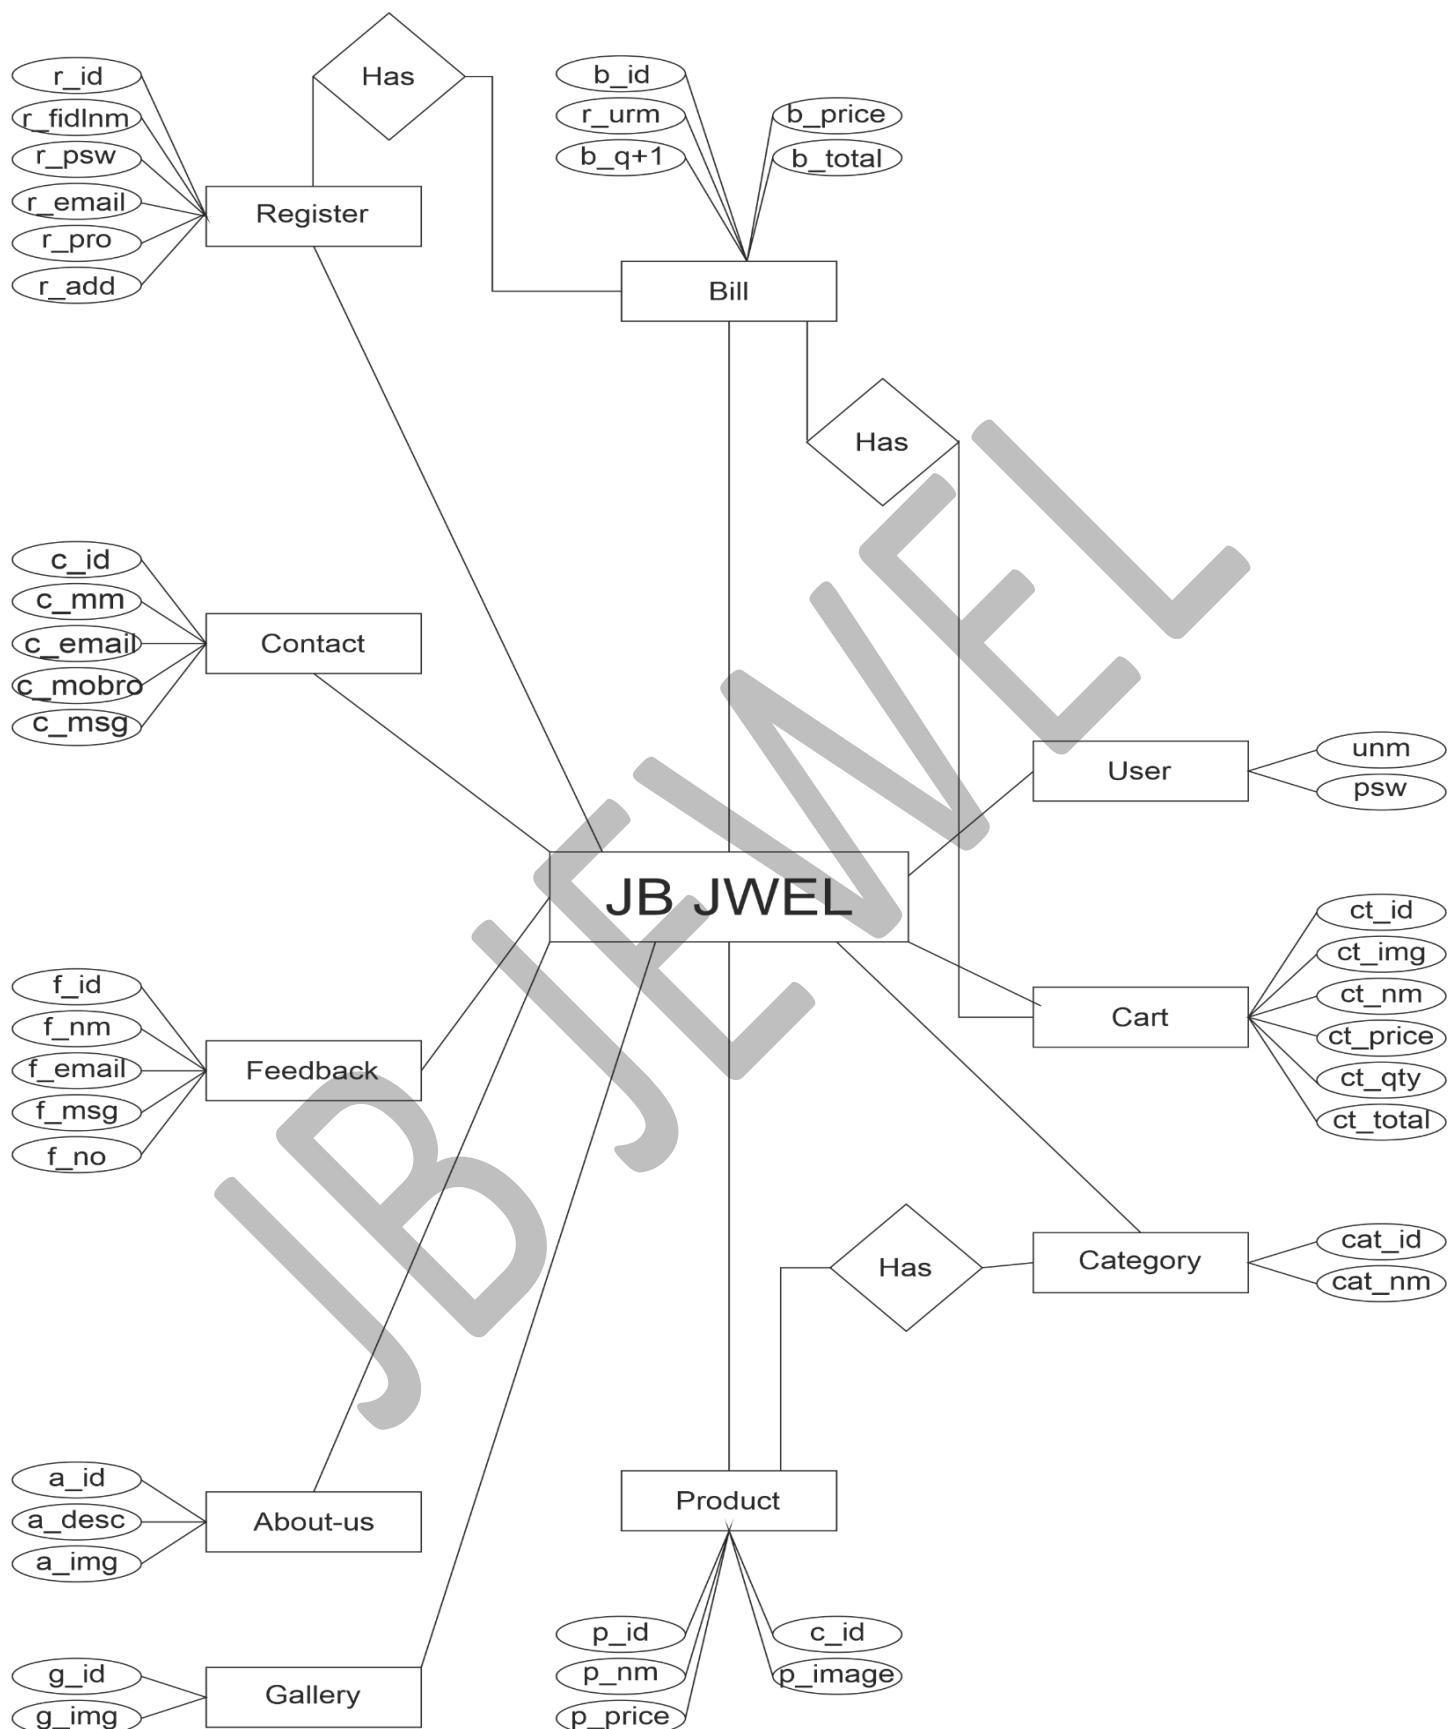

◆ **Operational:**

- ¤ It determines if the human resource are available to operate any system once it has been installed.it is also include on anylysis of how the purposed system wil affect organizational structure and procedure.
- ¤ If company has any issue or problem with project they can tell us after that we must try to solve the problem in issue within our capacity or limits.After the project completion or implementing many changes can occurs in feature because the updating is mandatory day to day.In this updating duration there are some errors or problems occur at that time owner of company can contact us.
- ¤ We just try to solve problem and give some tutorial and some direction or key point to owner by using that key can easily solve that problem.

2.5 DATA MODELING

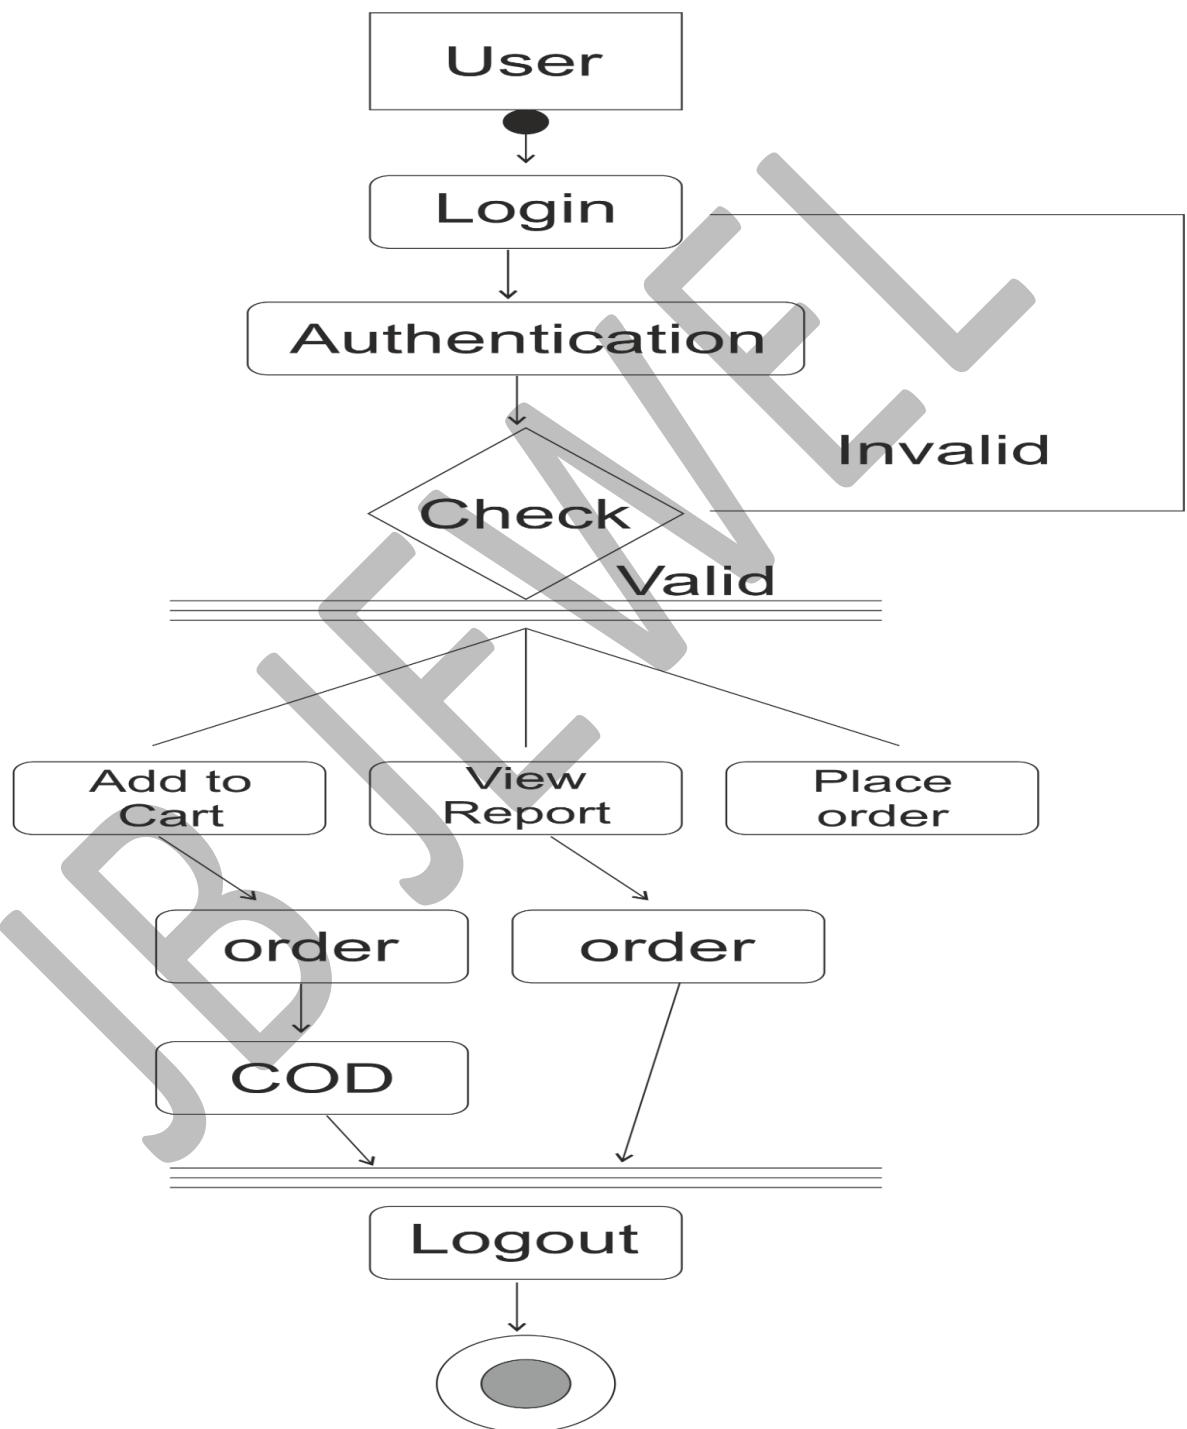

2.5.1 e-r diagram

An entity Relationship Diagram (ERD) is a data modeling technique that graphically illustrates an information system's entities and the relationship between those entities . An ERD is a conceptual and representation model of data used to represent the entity from work infrastructure.

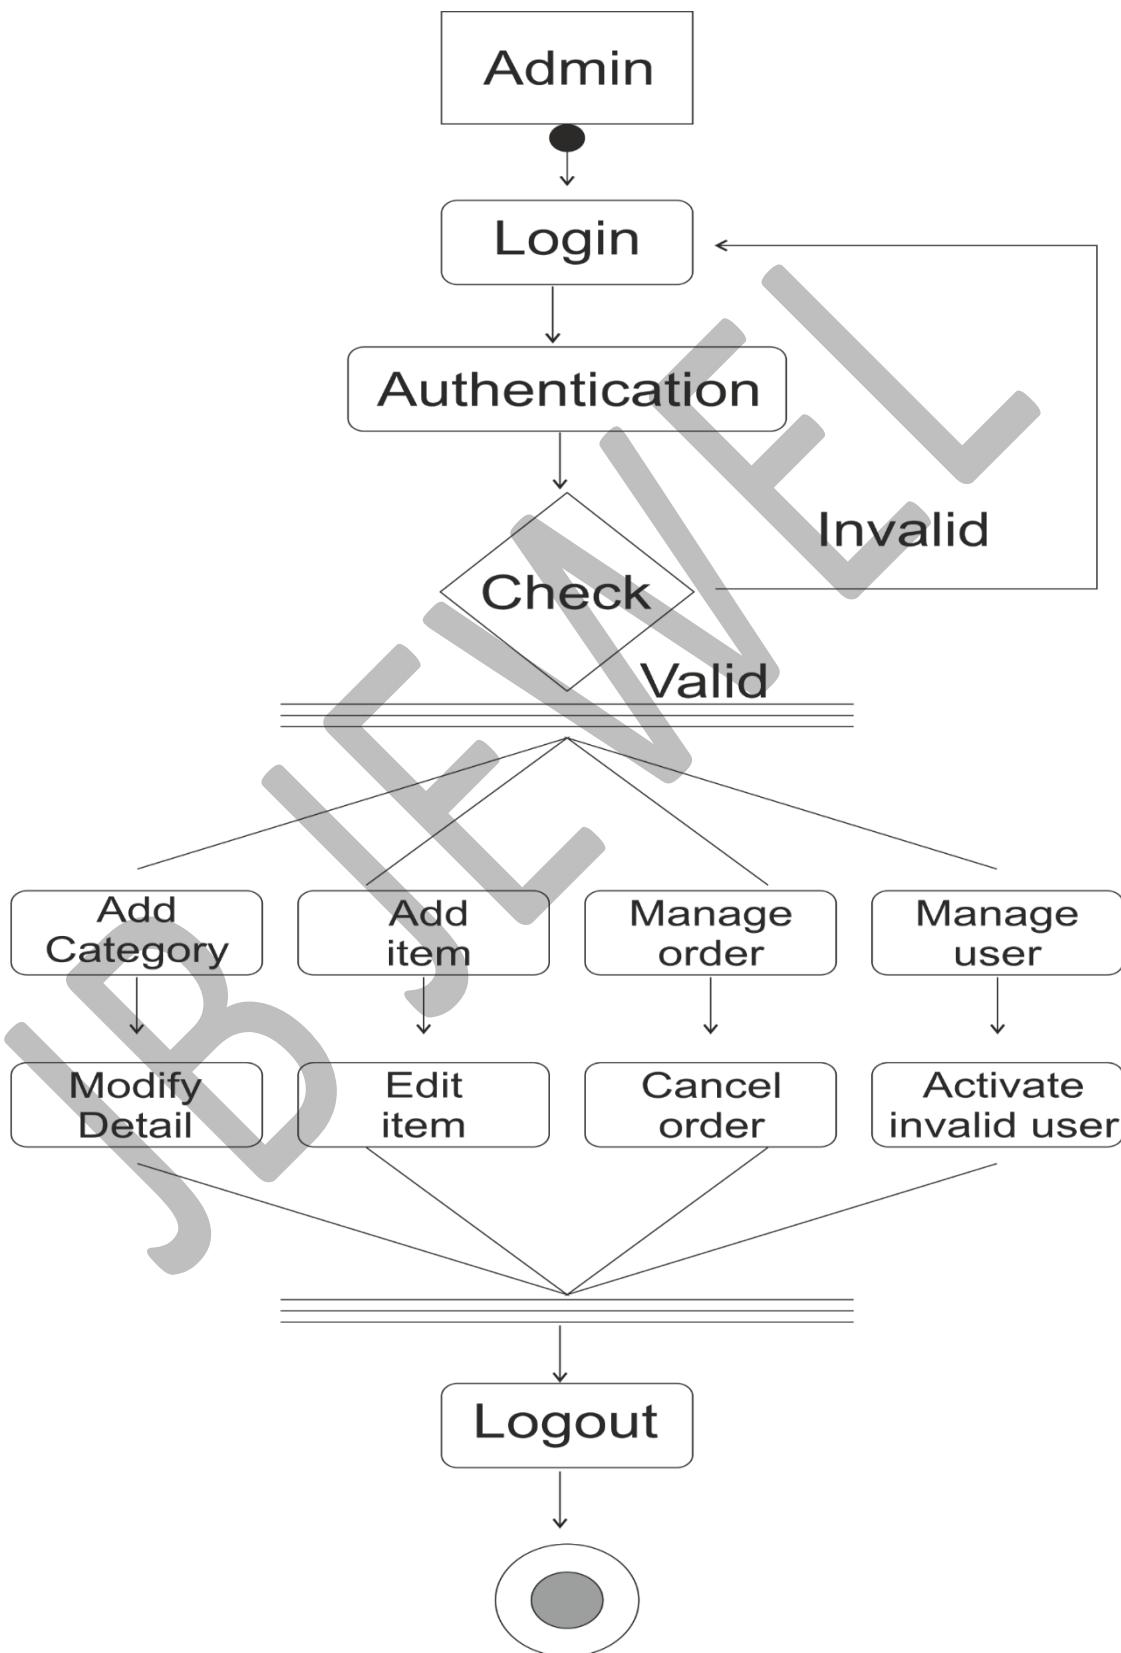

2.5.2 System Activity or object interaction Diagram

Clinet Side :

Admin Side :

2.5.3 data dictionary

In data dictionary there are 4 fields in table field name, Data type, size and description.

mydatabase:

Here we require a security for admin for that we think that we must provide a login facility because any admin cannot do the changes without permission.

Database Name: mydatabase

Table	Action	Rows	Type	Collation	Size	Overhead

3.0 TESTING

3.1 Testing Plan

Software testing can be stated as the process of verifying and validating whether a software or application is bug-free, meets the technical requirements as guided by its design and development , and meets the user requirements effectively and efficiently by handling all the exceptional and boundary cases.

software testing can be divided into two steps:

verification:

“are we building the product right?”

validation:

“are we building the right product?”

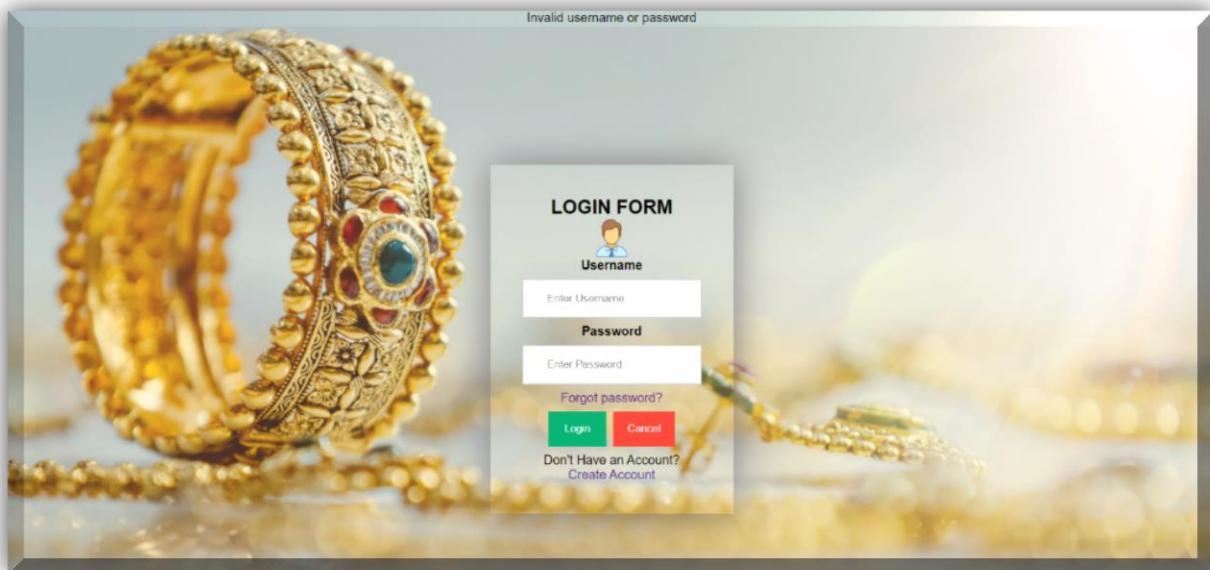

3.2 Testing Methods

software testing techniques can be majorly classified into two categories :

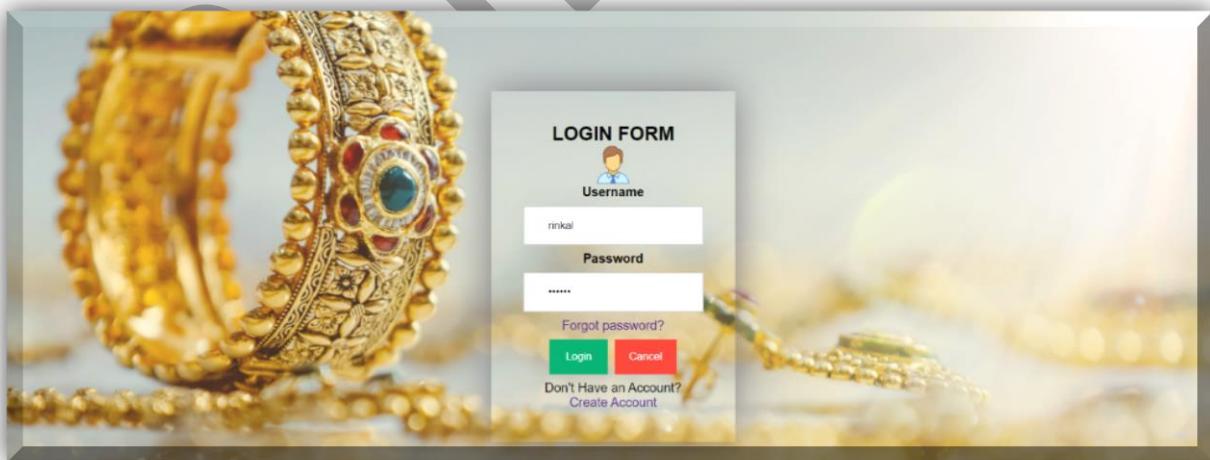

- ◆ **Black Box Testing**

It is a software testing techniques in which functionality of the software under test (SUT) is tested without looking at the internal code structure , implementation details and knowledge of internal paths of the software. This type of testing is based entirely on the software requirements and specifications.

Error: Invalid entered username or password

Solution: Enter valid password and username

◆ White Box testing

White Box testing is based on an analysis of internal working and structure of a piece of software. White box testing is the process of giving the input to the system and checking how the system processes that input to generate the required output. It is necessary for a tester to have full knowledge of the source code.

Error : After Logout Admin Click On Back Button.

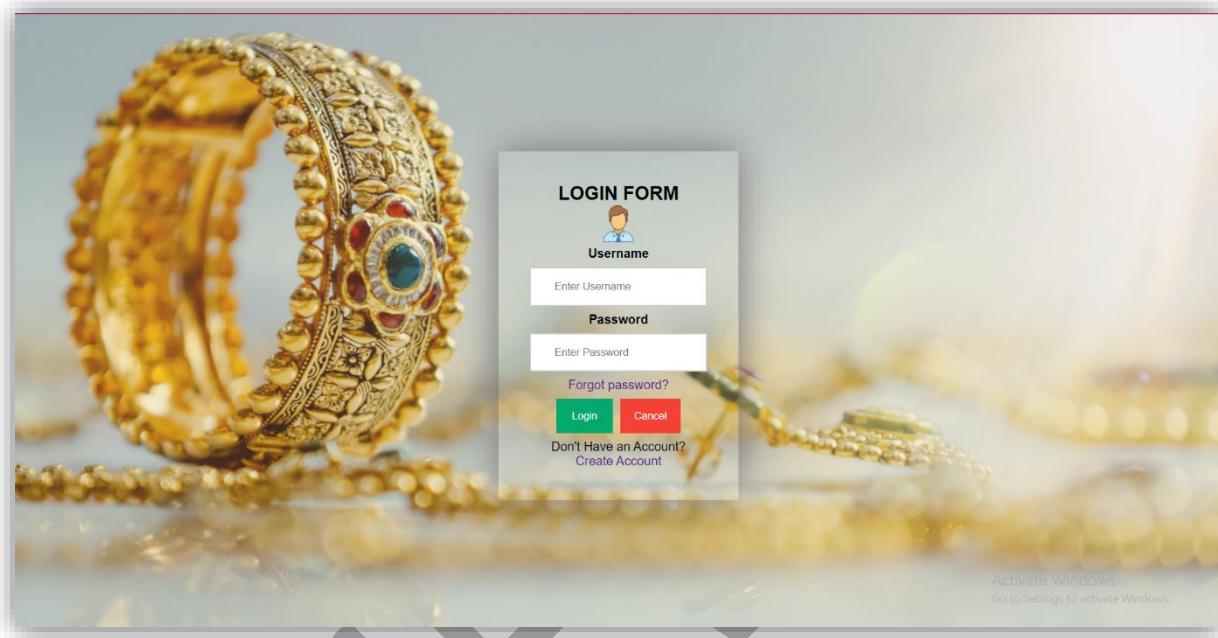

Solution : It Can't Done Because Of The Session So First Need To Login In Admin.

○ CATEGORY

The screenshot shows the 'Category' page of the JB JEWEL website. At the top, there is a navigation bar with links: HOME (highlighted in green), ABOUT US, CATEGORY, GALLERY, CONTACT US, FEEDBACK, MY CART, and SIGN OUT. Below the navigation bar, the word 'Category' is displayed in a dark banner. In the top right corner of the banner, there is a breadcrumb navigation: Home / Category. The background of the page features a dark wooden texture with the text 'TRADITIONAL JEWELLERY' faintly visible. A green button labeled 'Home / Category' is located in the top right corner of the main content area. Below the banner, the word 'CATEGORY' is centered in bold capital letters. A descriptive text follows: 'Some jewelry styles will never go out of vogue. It will always give the ideal touch of glitz to your daytime and evening ensembles.' Below this text are three small buttons: 'silver', 'Gold', and 'rose gold'. The overall layout is clean and professional.

○ PRODUCT

The screenshot shows the 'Product' page of the JB JEWEL website. The layout is similar to the Category page, with a navigation bar at the top featuring 'HOME' (highlighted in green) and other links: ABOUT US, CATEGORY, GALLERY, CONTACT US, FEEDBACK, MY CART, and SIGN OUT. The word 'Product' is displayed in a dark banner at the top left. A breadcrumb navigation 'Home / Product' is located in the top right corner. The background features a dark wooden texture with the text 'TRADITIONAL JEWELLERY'. Below the banner, there are four product images arranged in a row: 'MANGALSUTRA' (a gold necklace with a large circular pendant), 'PENDENT SET' (a gold pendant set with a chain), 'EARRING' (two gold earrings with intricate designs), and 'RING' (a gold ring in a pink velvet box). Each product image has its name written below it. A watermark 'Activate Windows' and 's-166406594' is visible in the bottom right corner of the page.

○ GALLERY

The screenshot shows the 'Gallery' section of the website. At the top, there's a navigation bar with links: HOME, ABOUT US, CATEGORY, GALLERY, CONTACT US, FEEDBACK, MY CART, and SIGN OUT. The 'GALLERY' link is highlighted in yellow. Below the navigation is a banner with the text 'TRADITIONAL JEWELLERY' and a small 'Home / Gallery' breadcrumb. The main content area features four images of jewelry pieces: a diamond necklace, two gold coins, a silver bracelet, and a rose gold necklace with a pendant. A watermark for 'Windows Activation' is visible across the bottom of the page.

○ CONTACT US

The screenshot shows the 'Contact Us' section of the website. The navigation bar at the top includes links for HOME, ABOUT US, CATEGORY, GALLERY, CONTACT US, FEEDBACK, MY CART, and SIGN OUT. The 'CONTACT US' link is highlighted in yellow. The main content area has a banner with 'TRADITIONAL JEWELLERY' and a 'Home / Contact Us' breadcrumb. Below the banner, there are two sections: 'GET IN TOUCH' on the left and 'CONTACT INFO' on the right. The 'GET IN TOUCH' section contains fields for 'Your Name', 'Your Email', 'Your Mobile_No', and 'Your Message'. The 'CONTACT INFO' section provides address details, phone number, email, and a note about activation.

GET IN TOUCH
Want to get in touch? we'd love to hear from you. Here's how you can reach us...So Let's have a talk?

Your Name
Your Email
Your Mobile_No
Your Message

CONTACT INFO
While we're good with smoke signals ,there are simpler ways for us to get in touch and answer your questions.

5.0 FUTURE ENHANCEMENT

In future we will provide the facility of online shopping. Billing will be added in our website and we also provide all the information related to the JB JEWEL. This website will be increasing in that and this is achievement of our website.

Our site can also make popular the products of JB JEWEL.

6.0 BIBLIOGRAPHY

[www.w3school.com write page list](http://www.w3school.com/write_page_list)

We use from this site some effects demo and done animation code.
